Igram

Igram, meaning “playing” in Croatian, is the word that best describes the process of creating this unique collection. Silent by stature and nature, Igram is an interplay of ambiance and function. The Igram wall lamp can do both at the same time. Facing the wall, the light only sketches the edges of the space it inhabits. Pointing towards the interior, it becomes even more functional, but stays discreet. The collection further plays with a unique multipurpose product Igram lamp + table, a floor lamp combined with a metal construction and various handcrafted tabletops.

Igram uses materials and production methods traditional to Grupa, and on the other hand, it offers innovation and special features characteristic within the brand’s offer, such as built-in LED light source and integrated touch dimmer. All this is best presented through the portable table lamp, rechargeable via USB with great battery autonomy, available in two versions, suitable for indoor and outdoor use.

Arigato

A statement behind the Arigato collection is to materialise a human gesture of gratitude through the design of an everyday object. Despite its elegant appearance, Arigato is a worker. Its adjustability and applicability ensure a beautiful performance in various spaces and contexts. The mobility of the shade and the arms of the lamp enables the projection of the light in every direction.

The collection is composed of table, floor, wall, pendant and ceiling models that come with a handmade steel body and aluminium shade in matte black or white powder coating. Arigato pendants are also available in a raw aluminium finish. Along with a 22 cm diameter lampshade throughout the collection, ceiling, wall and pendant versions are also available with 45 cm lampshades, longer arms and new bigger joints, taking regular Arigato lamps to a new level.

Arigato's joint system is custom made to hide the cable. It allows you to effortlessly move the lamp with a single gesture, without turning any knobs or levers. The shade joint is made from three different materials, which makes its adjustments completely silent.

Characteristics:
Press spun aluminium lampshade
and steel body shaped, welded and
assembled by hand. Powder coated.
Lampshade rotation 360 degrees.
Undershade included.

Colour:
White, Black

Raw option (lacquered raw
aluminum) available only on
pendant lamps.

Light Source:

Ili Ili is something of a toy for grown-ups that invites you to combine various forms and colours into your own personalised lamp. It is a series (collection) of modular pendant lamps composed of six different handcrafted aluminium elements. Coming in various shades of matte colours and different cable colours, the final combination of elements is determined by the user. By playing with the design through the online configurator, the customer builds their own lamp and creates a relationship with it even before it arrives at their home.

Ili Ili Cat's Hat Morning After Gone Fishing

Kiss Me Madame Bovary Morning After

Do you want to go a colourful or monochromatic way? You'd prefer a big, four-piece combination or a simple lamp with just one piece? Do you want that element upside down? The combinations and possibilities are almost limitless. And they all look amazing. So, let's play.

Characteristics:
Aluminium lampshade is press spun by hand. Powder coated in different matte shades. Plastic ceiling cup is included for pendant lamps.
Wall lamps include rotating arm, removable cord and On/Off switch on the lamp base. Cord and switch for wall lamps available only in black colour.

Light Source:
E27 max 75W (not included).

Baluna

Designing Baluna, we aimed to design light itself; the way it occupies space and affects mood. Every segment of Baluna has passed through the hands of master craftsmen who have shaped and painted the tubing and the shades, and handblown the glass. Their skilful eyes and expert touch guarantee the quality of each and every lamp. The collection is available with optional dimmer that enables maximum control over the light intensity. Finally, the triple coated satin glass opal diffuser, which can rotate around its axis infinitely, provides fine control over the ambient light.

All the functional parts, including the power switch, dimmer, power cord and powder coated tightening rings, have been custom designed to fit seamlessly into the form of the lamp. Apart from floor, table, wall, ceiling and pendant models, the Baluna collection is completed with two versions of chandeliers, the only products of this type and size offered by Grupa.

Model

Model is essentially a replication of a playful sketch in space, yet, in a way it was born out of consideration of the very material and an extreme reduction of elements from which a given object is made. Free from complications and with a “not yet finished” look, Model is a unique floor lamp. The final design is left to the customer and it depends on the choices provided by Grupa. To finish a Model, one has to choose from three different sets of steel frames in a black or white finish and various possibilities in the colour of the textile cord. The fact that the intensity of light is controlled only by the choice of bulbs means Model is free, not only from complications, but it is free, period. Model comes with a lightbulb selected by Grupa, however, everyone is free to experiment.

Dot

Dot is a collection of side tables that come in two dimensions and different colours, designed to follow the style and the thought of Grupa's lighting fixtures. The metal under-structure provides the strength and character which changes slightly depending on which side you look at it from. Whether as a standalone piece or a combination of two given dimensions of these side tables, Dot is always working for the space it is in. It is made of durable and lightweight materials, steel frame with aluminium top, so it can work both indoors or outdoors.
